

High Performance Low Price

With its new CX8 wheels, RBM boosts the quality of the production, increasing the shine given by the last position in the polishing process.

The continuous research of RBM's R&D Department, led to a new concept about cerium wheels, in which longer life, versatility of use and low TCO (Total Cost of Ownership) find their junction point, opening a wide range of opportunities for the final Customers.

Thanks to its compatibility with all the top level machines, both straight and double edgers, the CX8 series allows the Customers to save time and money without sacrificing the finest result about uniformity and shine.

 **CeO₂** New Cerium Oxide formula: maximum performances without compromises

Extremely long life, thanks to its special extra resistant bonding

Suitable for all machines

Extra shine finishing

Maximum versatility of use, up to 4.000 RPM

Eco friendly, thanks to its low water consumption

Low price + Long life + Best results = Low Total Cost Of Ownership
